ASSIGNMENT
Design a self-promotion website for yourself. Include samples of your best work!

REQUIREMENTS
Select 10-15 of your best pieces (include the files worked in all your Photoshop classes). Develop an original website to house your portfolio. The site must be developed entirely in Photoshop. You must have the following webpages:

MAIN PAGES-
Introductory Index page- An introductory page with an animation and a link to the Home page.

Home page- The Main page, provides a brief overview of your site and links to the content pages.

About page- A page with personal information about you- a short bio, education, job experience, and/or a link to your resume (if you’d like).

Portfolio page- Page with links to your work samples. Develop a navigation system to browse through your work- you are welcome to categorize it any way you’d like.

Contact page- A page with contact information (e-mail, address, phone).

Be sure to have a navigation system that allows a user to quickly access any page in your site!

You must develop a visual hierarchy that has as its primary focus the visual and then the accompanying info. Make sure all pieces belong together!

Research and conceptualize what would be needed to successfully accomplish the task.

PROJECT SPECIFICATIONS
You will turn in the following:
A folder containing your working site. I will upload this working website to the faculty server.

MECHANICAL SPECIFICATIONS
Suggested size for web:
Aim for a 800px X 600px monitor resolution.
Document size: 640 px X 480 px
